CORE EXPERTISE

AI Automation & Workflow Engineering

Designing scalable automation systems and intelligent workflows using n8n, Make, and GoHighLevel to optimize operations, lead management, and customer journeys.

Full-Stack Web Development

Building modern, responsive, and production-ready web applications, funnels, and business platforms with strong focus on performance, usability, and scalability.

CRM Systems & Business Operations

Implementing CRM infrastructures, sales pipelines, reporting systems, and operational processes that improve efficiency, automation, and team productivity.

AI-First Development & System Integration

Leveraging Claude Code, APIs, and MCP server architectures to create AI-powered solutions, custom integrations, and streamlined digital ecosystems.

Strategic Systems & Process Optimization

Analyzing workflows and business operations to develop automation strategies, SOPs, and scalable systems that reduce manual workload and support growth.
